WORK EXPERIENCE

Illumina Technology Solutions (Company Website)   **Apr 2025 - Present**
Frontend UI Developer   *Portland, OR*
- Designed and developed 10+ UI blocks and page layouts for an internal company portal, aligning with corporate branding and accessibility standards.
- Learnt about and worked in headless WordPress implementation with Next.js and PHP.
- Collaborated with stakeholders to translate business requirements into interactive wireframes and high-fidelity mock-ups.
- Implemented responsive, modular components using modern frontend frameworks and CSS methodologies.
- Ensured consistency across pages by defining and adhering to a design system and reusable component patterns.
- Participated in design reviews, feedback sessions, and iterative delivery cycles to refine and ship usable interfaces.
- Focused on performance and usability, optimizing page load times and ensuring cross-browser compatibility.

Illumina Technology Solutions   **Mar 2025 - Present**
React Native UI Developer   *Portland, OR*
- Developed a cross-platform mobile application in React Native for Android and iOS, integrating with MS Dynamics 365 and utilizing TypeScript and Tailwind CSS for streamlined styling and maintainability
- Collaborated with product managers, UX designers, and stakeholders to ensure a user-centric design and smooth user experience
- Built 15+ custom UI components ensuring performance, accessibility, and responsiveness
- Focused on delivering a seamless user experience by optimizing navigation, caching critical data, and reducing load time by 50%
- Utilized GluestackUI in the mobile application, using various components and adjusting styles based on usage

PartnerlinQ   **Mar 2022 - Jan 2025**
Consultant Frontend Engineer   *Lahore, Pakistan*
- Suggested and managed the enhancements in styling structures of multiple internal projects independently.
- Worked with the design and frontend implementation teams to ensure UX principles and design implementation were done correctly.
- Proactively implemented responsive web design solutions, ensuring usability across various devices, even when design guidance was unavailable.
- Led redesign of internal styling library, enabling 30% faster page builds and consistent theming through reusable class utilities.
- Engaged in Angular frontend implementation to further skill development and effectively managed frontend responsibilities.
- Facilitated discussions with senior management for improvements in design structure and implementation.
- Led the design implementation to replace Angular Material with PrimeNg, enhancing application performance and consistency across the platform

Systems Limited   **Jul 2021 - Mar 2022**
Junior Consultant Frontend   *Lahore, Pakistan*
- Worked closely with product managers, UX designers, and developers to understand project requirements and translate them into visually appealing and user-friendly UI designs.
- Worked with developers to ensure seamless integration of UI designs into the final product.
- Embraced an iterative design process and continuously seek feedback to refine and enhance the UI designs.
- Enrolled in various training programs to enhance proficiency in design and frontend development, continuously improving skill sets.
- Completed multiple internal projects to meet yearly objectives and client requirements.

EDUCATION

FAST - National University of Computer and Emerging Sciences, Pakistan   **2021**
BSc. (Hons.), Computer Science   *Lahore, Pakistan*
- **Achievements:** Successfully built a mobile application to suggest songs based on mood captured from selfies
