PROFESSIONAL PROFILE

Frontend Engineer with senior-level expertise in building UI-heavy applications using Angular and React. Led the redesign of a POS system, creating reusable component libraries and design systems that improved layout consistency across complex platforms. Delivered a React Native implementation of Microsoft Dynamics365 Ecom, accelerating development with AI tools while maintaining high-quality code. Seeking to leverage this experience to drive scalable, user-focused front-end solutions.

SKILLS SUMMARY

- **Frontend:** Angular 2+, React, React Native, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS, Scss
- **Libraries:** Material UI, gluestack-ui, Angular Material, PrimeNg, Ag Grid, Figma
- **Workflow & Tools:** Git, GitHub, Jira
- **AI Assisted Development:** ChatGPT, Claude
- **Deployment & CI/CD:** GitHub Actions, Hostinger

WORK EXPERIENCE

Illumina Technology Solutions

Jan 2025 - Present

Frontend & Mobile UI Developer

Portland, OR

- Restructured inconsistent UI layouts and components in internal applications using PrimeNG and responsive web-design principles, creating reusable pattern libraries that streamlined development and improved UI consistency across the product suite
- Redesigned key POS system flows by identifying usability gaps, producing high-fidelity Figma mockups, and implementing the updates with React and PrimeNG, which clarified user interactions and reduced support tickets related to navigation
- Refactored UI implementation based on updated designs, focusing on keeping behavior consistent across screens and reducing one-off component variations
- Worked on creating 25+ components for a React Native application which was an implementation of Microsoft Dynamics365 Ecom web service
- Translated design into production UI while minimizing inconsistencies between Figma and implementation
- Regularly used AI tools (ChatGPT, Claude) to explore approaches, validate solutions, and speed up iteration without compromising code quality

PartnerlinQ

Mar 2022 - Jan 2025

Consultant Frontend Engineer

Lahore, Pakistan

- Worked on projects where frontend styling had become difficult to maintain, introducing structure and consistency across components and layouts
- Handled the UI side of migration from Angular Material to PrimeNG, resolving inconsistencies in component behavior and aligning UI with updated design requirements
- Built a SCSS mixin-based styling approach to replace scattered and repetitive styles, making it easier to maintain and reuse UI patterns
- Improved responsive behavior in cases where layouts broke across devices, restructuring components to handle different screen sizes more reliably
- Took ownership of UI issues that weren't clearly defined, identifying inconsistencies and standardizing behavior across different parts of the application
- Worked closely with design and frontend teams to reduce drift between intended design and actual implementation

Systems Limited

Jul 2021 - Mar 2022

Junior Consultant Frontend

Lahore, Pakistan

- Implemented UI for enterprise applications using HTML5, CSS (Sass) and JavaScript to match Figma designs, creating consistent layouts and reusable components, which streamlined development and reduced design revisions
- Handled common UI issues such as layout misalignment, inconsistent spacing, and component reuse across modules
- Collaborated with designers and developers to refine interfaces and improve overall usability
- Gradually took on more responsibility in structuring UI components and maintaining consistency across screens
- Completed multiple internal projects to meet yearly objectives and client requirements.

Projects

Amigos Overseas Education | <https://amigosoverseaseducation.com/> **Sep 2025 - Present**
Amigos *Lahore, Pakistan*

- Built the frontend UI from scratch for a content-heavy website where information needed to be structured clearly for users
- Used AI tools (ChatGPT, Claude) as part of the development workflow to iterate faster, explore layout approaches, and refine implementation
- Set up deployment pipeline using GitHub Actions and deployed the site on Hostinger, handling the process end-to-end
- Structured layouts to keep navigation intuitive and reduce content clutter across pages
- Ensured responsive behavior so the site remained usable across devices

Amigos Aura | <https://amigosaura.com/> **Nov 2025 - Present**
Amigos *Lahore, Pakistan*

- Built a UI-focused website from scratch with emphasis on layout balance and clean visual structure
- Used AI-assisted development to speed up iteration and refine styling and component structure
- Set up GitHub Actions for deployment and handled hosting setup on Hostinger
- Maintained consistency in spacing, typography, and overall UI presentation across sections
- Focused on delivering a smooth and visually coherent experience across devices

EDUCATION

FAST - National University of Computer and Emerging Sciences, Pakistan **2021**
BSc. (Hons.), Computer Science *Lahore, Pakistan*

- **Achievements:** Successfully built a mobile application to suggest songs based on mood captured from selfies
